PROJECT DETAILS

Project: 1

Project Name : Jobsfactory.in
Technology : Java - Selenium, Manual Testing, Automated Testing.
Team Size : 3
Site URL : <http://www.jobsfactory.in>

Jobs Factory is an online portal which is aimed at supporting prospective candidates looking for jobs in frontline roles in companies that demonstrate fair employer approach and policies. Traditionally, candidates for all frontline jobs are hired either through advertisement, campus hiring, and sourcing through employment exchange support. As a result many organizations have challenge in reaching out to the potential / deserving candidates and vice-versa owing to the inaccessibility for both to reach each other. This portal tries to bring both the stakeholders together.

Project: 2

Project Name : Court Case Master
Technology : Java - Selenium, Manual Testing, Automated Testing.
Team Size : 3
Site URL : Internal Portal

The objective of the software is to provide the repository of high court cases and supreme court cases for easy access in desktop computer and mobile version. The main modules in the portal are Court Master, Law Master, Judge Master, Section Master and Court Case Master. It has 2 sections. Administrator and Front End. Admin section where all the case details will be entered based on law and sections. All the case details will be search in the front end with various filters like keywords, judgment dates, law and sections, courts and locations.
