Key Projects Undertaken

Online Bill Board

Duration: 5 months (2014)

Team size: 1

Role: Designing, Coding and Module Development

Environment: : Java/j2ee (JDBC, Servlets, JSP)

Web Technologies   : Html, JavaScript, CSS

Detail : The main aim of the application is to build a Classifieds website. The website has to provide different kinds of facilities to the users like Education, Rental, Real estate, Situations vacant, Sunday cinema, Wheels used cars, Matrimonial, Mailing, Job Searching facility. Another important reason for the popularity of Internet Users is the advent of Online Job opportunities, Matrimonial and Rental. Now the people are able to do search without wasting their precious time. This make searching flexible.

This Application has been divided into three modules based on the functionalities.

    1. User Module

    2. Admin Module

    3. Reports Module

<u>Social Networking for Organization</u>

Duration: 5 months (2013)
